This is the first office action for serial number 10/772,950, Coupler for Cable Trough, filed October 24, 2003. This application is a divisional of 09/991,382.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 25, 26 and 41-43 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-26 of U.S. Patent No. 6,709,186B to Ferris. Although the conflicting claims are not identical, they are not patentably distinct from each other because a reading of the instant claims clearly indicates that the subject matter thereof is fully disclosed by the claims of the patent and/or that portion of the patent disclosure, which provides support for such claims. Therefore, it is self-evident that the instant claims are nothing more than an obvious variation of the invention disclosed and claimed in Ferris '186 and cannot properly issue in the absence of a terminal disclaimer. Furthermore, it is clear that the inventor could have included the instant claims in the patent and if the instant application were to issue without a terminal disclaimer protection of the previously patent invention would be improperly extended until the expiration of the instant

claims since the utilization of such invention would infringe the instant claims. Additionally, since the method is based upon the structural limitations claimed therein, the method is inherent.
